

Shredding Matters Fall 2006

New Federal Government Tested and Approved Shredders for Paper

In our last newsletter we discussed the new chaff sizes for paper shredders, and new categories. Our manufactures sent numerous shredders to the testing program to meet the requirements of the newly established government guidelines. The models listed below all passed, and will be listed in the SEG at http://www.rcmp-grc.gc.ca/tsb-genet/seg/html/home_e.htm . Shredders are approved for the destruction of information written in 12 point font or larger. Level 6 is recommended when these conditions are not met. Below outlines the categories and federal government approved shredders.

CATEGORIES	BRAND/MODELS	SHRED SIZE UP TO
TYPE II, Office Paper	INTIMUS	Width x Length
Protected C, Secret and Top Secret	402HS, 502HS, 602HS, 007SX, 0077SX	1 x 14.3mm (1/16 x 9/16" inch)
	HSM

Type II (Level 6) (new sub-category) All Intimus/HSM shredders listed on the NSA site.

(Based on RCMP endorsement of USA-NSA High Security Shredder Standards and testing program). General office use recommended for Secret, Top Secret and Protected C where Treat Risk Analysis recommends higher security destruction. Only those models submitted for testing are listed in the Security Equipment Guide. NSA Standard for Level 6 is based on area: 1mm x 5mm

With this large selection of approved shredders we will be capable of providing a shredding solution regardless of the requirement your department may have.

The RCMP has recently released a new Guideline for Destruction Equipment Selection, which will appear in the next update to the Security Equipment Guide. It covers the requirements for Paper and IT destruction to various security levels as well as how to choose Commercial Destruction Services. It is a very comprehensive guide that every security officer should become familiar with. If you do not have a copy, send us your email address and we will provide you with one.
